TREX is pleased to host a workshop on multi-exit BGP together with sponsors **Juniper Networks**¹ and **Cisco Systems**². The workshop will be held on Thursday, February 12th 2009 at the **Hermial Auditorium**³ in Tampere from 12:00 to 17:00 and will continue in the Hermia 1 Sauna until 04:00. The workshop will be of value to anyone interested in arranging multiple peering or transit locations in their network, and anyone interested in peering at **TREX Regional Exchanges Oy**⁴.

Multi-exit BGP refers to the case where two operators have multiple interconnections in different places, such as on internet exchanges in different cities. Adopting this practise often warrants a rethinking of traffic engineering and peering policies.

Registration

The workshop is free to all invited and preregistered parties. Snacks and beverages will be provided. Registration for the seminar has closed.

Parking

You will get parking permits from the lobby. The parking permits should be placed on the windshield of your car.
