What is this all up?

Wireless Tampere –network community

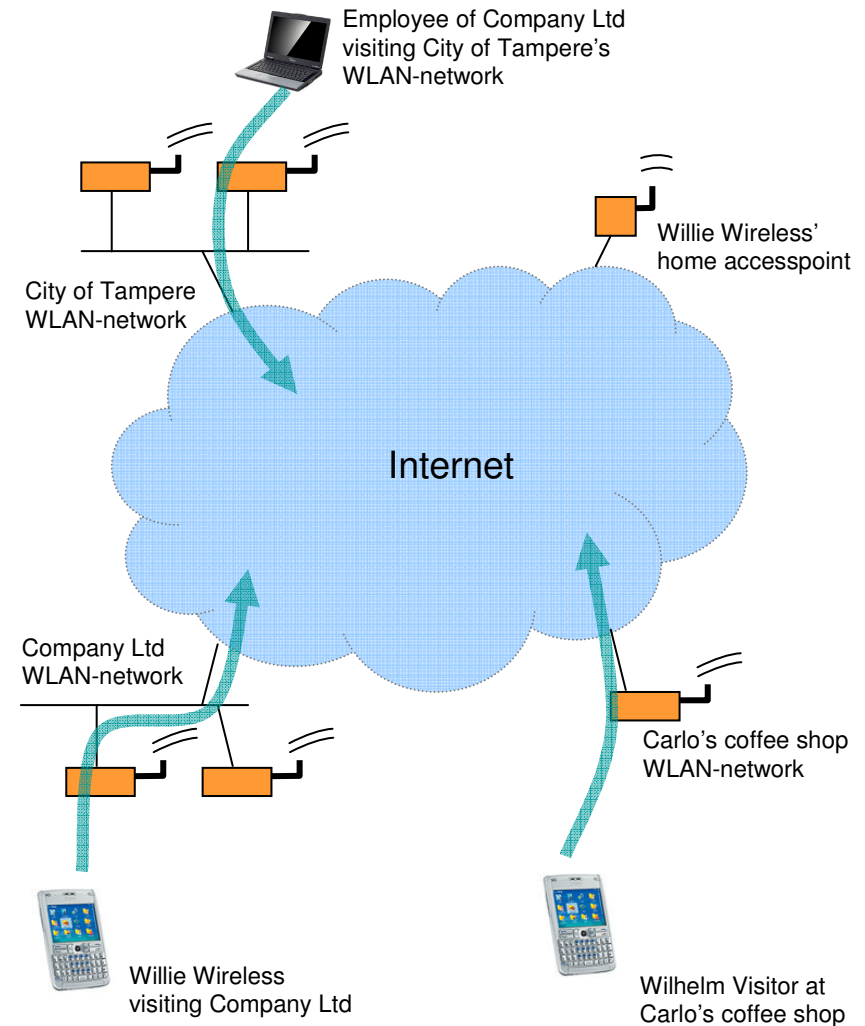

- Internet access with a laptop or WLAN capable mobile phone
- Internet access in any place any time

Wireless Tampere –network community

- Share your WLAN-network and internet connection to others – In a safely and controllable way
- You get the same service from others

Wireless Tampere is not a free internet access

- You still need a broadband connection
- Visiting other WLAN-networks is ok

- *World along.*

Wireless Tampere at your service

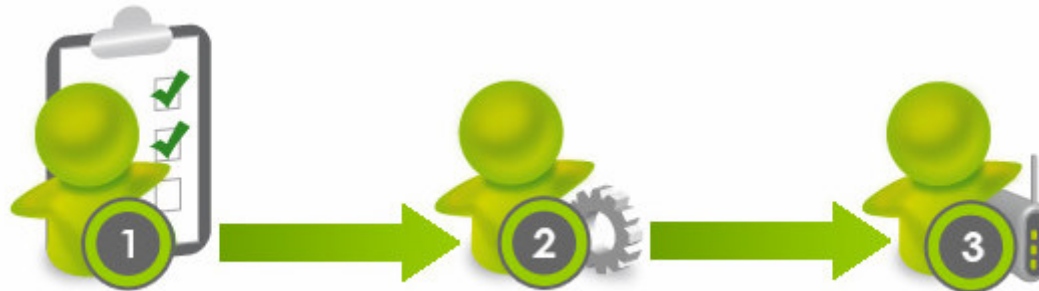

- There are now 600+ accesspoints in Wireless Tampere, new accesspoints installed daily
- Access point map at www.langatontampere.fi (in finnish)

- World along.

Home users

- Easy, safe and free for home users
 - Home user needs a broadband connection and a WLAN accesspoint (Wireless Tampere is not a free internet access)
 - Username and access point self-registration at www.langatontampere.fi
 - Support for home users from eTupa, one of the service providers in Wireless Tampere ecosystem
 - Home users are able to connect to any access point in Wireless Tampere

Businesses and other organizations

- Affordable, easy and safe
 - Organization needs an internet connection, WLAN access points and an authentication system
 - Several service providers for businesses in the Wireless Tampere ecosystem – choose the best for your needs!
 - For a company with less than 25 employees, the cost is 460 €/year (not including internet connection and the access point)
 - The investment is profitable if the company is able to get 14 hours of additional work per year
- Company employees get user accounts to be used all around Wireless Tampere
 - Mobile/remote work at home is made possible with the free *Home user solution*
 - A single way to work outside of company premises – less training, more efficiency

Visitors, travellers

- Visitor/traveller gets a visitor account from
 1. his/her host at both homes and businesses
 2. a Wireless Tampere wide visitor account with a text message

<u>Time limit</u>	<u>price</u>	<u>ordercode</u>
