

Wireless Tampere

- a cooperative open wireless community network for companies, consumers, education and research institutions
- based on the RADIUS based eduroam(tm) technology for roaming
- 58 realms, 44220 roaming authentications/year, all major cities and education institutions at Tampere region, roughly 900 access points (most of them in public places)
- participates already in Funet WLAN roaming, interested to roam with also other municipal, community and commercial Wi-Fi networks

Funet WLAN Roaming

- RADIUS based Wi-Fi roaming since 2002, since 2004 in production use
- Together with eduroam(tm) Finland the center for Finnish education and research roaming
- About 50 realms, roughly 88000 roaming authentications / year, over 1000 access points in educational institutions
- Roams with Wireless Tampere and Sparknet community networks, open for other roaming partners and roaming research as a part of ICT SHOK Future Internet Testbed
