## Press Release

Tampere, 1st of July, 2018

Ainacom, Nebula and Equinix left TREX over the summer.

Ainacom has sold most of its network operations to Telia Finland, so they have no more use for their TREX connection. Telia Finland has also acquired Nebula and Nebula's national network backbone is being replaced by Telia Finland's national network.

Equinix has a new policy for connecting only to IXPs in the same metro area as their data centres, and Equinix and TREX do not operate in the same metro area. Therefore Equinix is disconnecting from TREX.
