The price list for TREX services is detailed on this page. Some services are covered by the monthly membership fee. These include the basic peering services and public anycast services.

Our policy is that the member chooses the SFP/SFP+/QSFP modules that they are going to need. They can bring their own module, or they can lease or buy modules from TREX, if available.

The first two (2) SFP switch ports are bundle priced much cheaper than further ports. Fibre cross connects to **meet me rooms** for these first ports are also included in the bundles. The ports can be Gigabit Ethernet (SFP) or Ten Gigabit Ethernet (SFP+) ports. Faster ports do not get bundle pricing. Pricing for 100GbE ports will be available on request.

If the customer wants one SFP and one SFP+ then both initial ports are counted as SFP+ ports. If the customer has several ports of differing speeds then the bundled ports are always the cheapest ports.

If the customer does not use up ports in the TREX switch fabric, they need not pay any port fees. This is typically the case for **Reseller Customers** and some research projects.

The following table lists the fees for the services. All prices are in Euros and the Finnish VAT (24%) is not included in the prices.

Service	Price	Comments
Joining fee	420€	each
Membership fee	60€	per month
First two SFP slots	60€	per month
First two SFP+ slots	160€	per month
<b>Unicast Peering</b>	0€	Primary Service
<b>IPv4 Multicast Peering</b>	0€	Primary Service
<b>IPv6 Multicast Peering</b>	0€	Primary Service
<b>Private Service</b> or Research VLAN aka CUG	100€	creation
Link Aggregation	100€	change
<b>Route Servers</b>	0€	Secondary Service
IEEE802.3ba port aka 40GbE	240€	per month
Extra IEEE802.3ae port aka 10GBASE	100€	per month
Extra 10/100/1000 port	30€	per month
Connection fee for extra ports and VLANs	100€	each
Leasing of extra fibre cross connects	10€	per month
Private Network Interconnect	10€	per month
