The price list for TREX services is detailed on this page. Some services are covered by the monthly membership fee. These include the basic peering services and public anycast services.

Our policy is that the member chooses the SFP/SFP+/QSFP modules that they are going to need. They can bring their own module, or they can lease or buy modules from TREX, if available.

The first two (2) SFP switch ports are bundle priced much cheaper than further ports. Fibre cross connects to **meet me rooms** for these first ports are also included in the bundles. The ports can be Gigabit Ethernet (SFP) or Ten Gigabit Ethernet (SFP+) ports. Faster ports do not get bundle pricing.

If the customer wants one SFP and one SFP+ then both initial ports are counted as SFP+ ports. If the customer has several ports of differing speeds then the bundled ports are always the cheapest ports.

If the customer does not use up ports in the TREX switch fabric, they need not pay any port fees. This is typically the case for **Reseller Customers** and some research projects.

The following table lists the fees for the services. All prices are in Euros and the Finnish VAT is not included in the prices.

Service	Price		Comments
Joining fee	420€	each	
Membership fee	60€	per month	Mandatory
First two SFP slots	60€	per month	
First two SFP+ slots	160€	per month	
Extra IEEE802.3ae port aka SFP+	100€	per month	
IEEE802.3ba port at 40GbE	240€	per month	QSFP+
IEEE802.3ba port at 100GbE	600€	per month	QSFP28
Link Aggregation	100€	per change	
Connection fee for extra ports and VLANs	100€	each	
Private Service or Research VLAN aka CUG	100€	per change	
Leasing of extra fibre cross connects	10€	per month	to **meet me rooms**
Private Network Interconnect	10€	per month	dark fibre
CWDM Lambda Between Sites	100€	per month	1470-1610nm
